

Gabbro

Full Stack Developer

Profile

Front end Developer with proven experience at JD.com and Meituan in helping companies creating and maintaining a better project. With experience in driving projects forward as the project dev owner, facilitating projects from concept to launch. Passionate about learning and development with a desire to apply skills on a larger development team. Eager to tackle more complex problems and continue to find ways to maximize user efficiency.

Employment History

SDE at Meituan

June 2022 — January 2024

1. Responsible for the web front end of short video open platform and the operating system for operations staff.
2. Migrated the Java back end project to Node., and then we were responsible for the full-stack development of the project, which reduced development time by 10% and increased efficiency.
3. Participated in the development of many activities to attract new user, such as the preferential shopping system for new users. Generally speaking, I assisted the team in achieving the goal of attracting new users with a daily average of 20,000.
4. Responsible for project optimization. By aggregation of http requests, SSR and other means, the second opening rate of the page has been increased from 40% to 70%.
5. In order to adapt to the architectural changes of Meituan's homepage, I reconstructed and maintained the low-code platform that produced the new homepage architecture protocol.

Front-end Engineer at JD.com

June 2021 — September 2021

As an intern in JD.com, I participated in the work of the internal low-code platform and was responsible for the layout engine development using bpmn.

Education

Bachelor, Beijing University of Chemical Technology, Beijing

September 2018 — June 2022
